COMPANY **PROFILE**

WELCOME TO OUR COMPANY

At Imperial works, we sell our services, knowledge and passion for providing value added solutions in order to satisfy the needs of our clients, no matter the challenges.

Protect and preserve buildings, structures, and infrastructures from water damage, ensuring longevity and enhanced durability. Commitment to excellence, customer satisfaction, cutting-edge technology, and environmentally friendly practices.

To be the go-to choice for homeowners and building owners seeking reliable and effective waterproofing solutions, synonymous with quality, professionalism, and customer satisfaction. Provide comprehensive waterproofing solutions that ensure the long-term structural integrity of buildings, offering peace of mind to homeowners and building owners.- Supreme Waterproofing consciousness.

COMPANY ABOUT US

At Imperial Works, we are dedicated to delivering top-tier concrete waterproofing and flooring solutions that enhance durability, functionality, and aesthetics. With years of industry experience, we have earned a reputation for quality craftsmanship, innovative techniques, and reliable service.

Our team of experts specializes in waterproofing solutions that protect structures from moisture damage and flooring systems designed for strength and longevity. Whether for residential, commercial, or industrial projects, we ensure precision, efficiency, and customer satisfaction in every project we undertake.

At Imperial Works, we don't just build, we protect, strengthen, and enhance surfaces that stand the test of time.

Our Mission: To provide quality waterproofing and flooring solutions that ensure safety, durability, and excellence.

Our Vision: To be the leading name in concrete protection and flooring innovation, trusted by clients globally".

INTRODUCING THE COMPANY

Imperial Works is an indigenous company that specializes on waterproofing and construction chemical solutions. The Company is managed by Indigenous Experts who have world class experience in various technical abilities ranging from;

- Modified Polymer application, such as crack bridging membrane, tough elastomeric watertight membrane for rooftops.
- Concrete repairs, such as vertical and overhead repairs to restore cover screed, general concrete and masonry repairs, voids greater than 10mm deep, repairs to honeycombing, larger scale repair where foam works cannot be erected.
- Pressure grouting, such as gaseous expansion system, pedestrian bridge deck duct, slip form silo tendon duct, prestressed structural element cable duct, low viscosity penetration into the finest cracks, filling to an impermeable mass where flexible differential movement is required in a dry or moist substrate, rapid action to stop moving water.
- Joint sealant application, such as movement joint in building and civil engineering structure, reservoirs underwater structures and many more. Swellable water stop and water bar installation, such as integral sealing for construction joints in concrete cast in situ, simple solution for detailing pipe entries, construction joints in the vertical plain and kicker joints, water retaining dams and canals, water towers, sewage tanks and swimming pools, water excluding basements and underground car parks.
- Free flow grout, such as machine base plates grouting in dynamic load situations and red podcasting machinery, bridge bearing anchor bolts and rods, column bases and heavy industrial application in steel works, refinery chemical plants, structural infill where high strength is required, rail tracks application and many more.
- The following pictorial pages illustrate briefly some of the works executed by the company

WATER BAR INSTALLATIONS

Installation of waterbar to prevent leakages from the joint.

SELLABLE WATER STOP FOR WATERPROOFING OF JOINTS

WATERPROOFING OF SWIMMING POOL

EPOXY FLOORING DAMP TESTING

DECORATIVE PAINT COATING

EXPANSION JOINT TREATMENT

Expansion joint treatment involves sealing and protecting joints in buildings, bridges, or other structures to accommodate movement and prevent damage.

WATERPROOFING OF 15000cm³ **KAFANCHAN WATER TANK**

TREATMENT OF FOUNDATION AGAINST RISING DAMP

CRYSTALLIZATION OF DAMP WALL

OREDO FLOW STATION COMPRESSOR GROUTING

Compressor grouting is a process used to repair and stabilize concrete foundations, particularly under machinery or equipment that experiences vibration or movement, such as compressors. Grouting involves injecting a high-strength, non-shrink grout material into the gap between the machinery base plate and the concrete foundation.

INJECTION GROUTING

VITA CONSTRUCTION

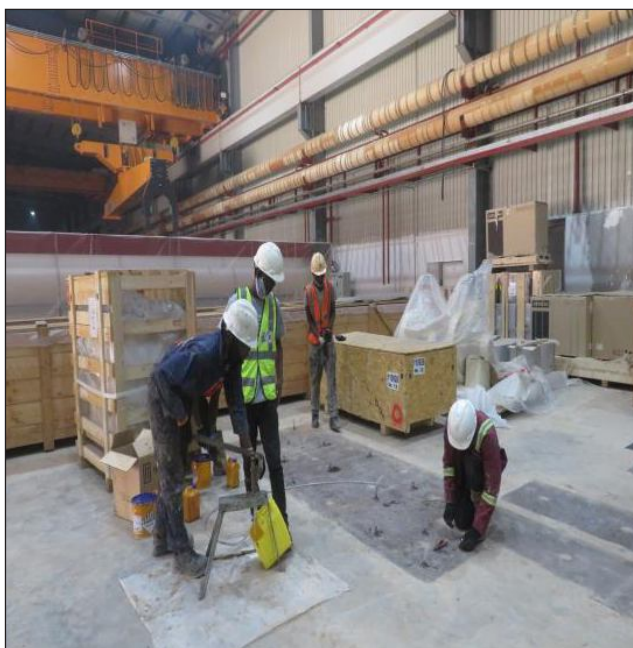

**DANGOTER FERTILIZER
WATER PIPE CHAMBER**

DANGOTE FERTILIZER PORTABLE WATER TANK

DANGOTE FERTILIZER WATER PIPE CHAMBER

Injection grouting is a process of filling\ the cracks, voids or honeycombs under pressure in concrete or masonry structural members for repairing of cracks, strengthening of damaged concrete or masonry structural members.

VITA CONSTRUCTION

DANGOTE FERTILIZER PORTABLE WATER TANK

WATERPROOFING OF EXTERNAL WALLS

TRINITY TOWERS, ONIRU, VICTORIA ISLAND, LAGOS

WATERPROOFING OF WATER FOUNTAIN

PAN ATLANTIC UNIVERSITY (PAU)
